LOPARDO

The quintessential Made in Italy

**Mr. LOPARDO
GIUSEPPE**

Lopardo Inox specializes in manufacturing premium stainless steel cookware and household articles, characterized by an exclusive Made in Italy guarantee. Our foundational business philosophy centers on core principles: unwavering product quality, highly effective service, comprehensive widespread distribution, and a continuous, absolute focus on meeting our customers' needs. For all our pots, casseroles, and frying pans, we exclusively utilize 304 and 430 stainless steel discs and sheets. This material selection

is paramount, proven perfect due to its extreme corrosion resistance, exceptional robustness, inherent hygiene, and up to 100% recyclability. Procedures and raw materials are critically important: from steel thickness to the specific grade used, every factor profoundly influences the entire process and the resulting final product. Our use of technologically advanced machinery ensures all production steps are executed using the most modern systems. The journey begins with a flat stainless steel disc, which is placed on a mold. Through oleodynamic pressure, the disc is precisely formed into the pot's typical cylindrical shape. This forming stage is meticulously repeated until the predetermined depth and specific features are achieved. Following this, the body is accurately trimmed and finished before proceeding to detailed cleaning. The subsequent polishing phase is crucial, not only for eliminating any slight imperfections but also for achieving the precise aesthetic details outlined in the design. Once polished, the product is thoroughly washed and then expertly assembled with high-quality, durable handles. The final labeling and packaging complete the finished item, marking it ready for seamless delivery and sale.

CUOCIVAPORE IN STAINLESS STEEL

Thanks to the Lopardo Inox Cuocivapore, you can prepare all your foods—including vegetables, meat, and fish—in a healthy, light way, without compromising their essential nutritional properties, vitamins, or minerals. The Cuocivapore set is comprised of three elements: a durable, long-lasting stainless steel casserole (pot) and a corresponding stainless steel steamer basket. It also includes a tempered glass lid, which effectively traps moisture inside the basket and allows you to monitor the food while cooking without lifting the cover.

CUOCIPASTA IN STAINLESS STEEL

The Lopardo Inox cuocipasta is entirely crafted from high-quality 18/10 stainless steel. The practical pasta basket allows you to cook and drain the pasta without dispersing the valuable cooking water. Furthermore, the differentiated holes ensure that boiling water circulates freely, optimizing the cooking process for consistently perfect results. The pot is complete with a tempered glass lid, allowing you to easily monitor the cooking process. Versatile and functional, it is also ideal for induction cooking and can be conveniently washed in the dishwasher. The cuocipasta is a premium Made in Italy product that successfully combines both functionality and aesthetics.

PASTA E PASTA IN STAINLESS STEEL

The innovative pasta e pasta is an 18/10 stainless steel boiling pot featuring a dual-basket system that allows you to simultaneously cook two different types of pasta in the same pot. The two baskets, made of stainless steel micro-perforated mesh, are equipped with practical, removable pincer handles. These handles allow you to drain food quickly and in complete safety without having to lift the entire pot. This solution is suitable for all cooktops, including induction, and is completely dishwasher safe. The pasta e pasta is an excellent Made in Italy product that merges practicality, efficiency, and quality for your everyday preparations.

TEMPERED GLASS LID

This practical and durable lid is made from robust tempered glass, making it resistant to thermal shock. It is finished with a stainless steel rim, which ensures a non-slip placement and a perfect fit with the pot below. The transparency of the glass allows for constant monitoring of the cooking process without the need to lift the lid. Equipped with an ergonomic Bakelite handle and a steam vent, it is dishwasher safe and perfect for every type of pot, casserole, and frying pan.
